

Locking in
freshness.
Unlocking new
opportunities

Keep your business growth uninterrupted
with our unbroken cold chain solutions.

From your farm to kitchens around the world

Garden-fresh produce is nothing without its freshness. The crunch of healthy lettuces, the zest of the citruses or the richness of avocados is irreplaceable. Which is why keeping the goodness of such produce intact is of utmost importance, no matter the distance. Our unbroken cold chain journeys are designed to agree.

Maersk's end-to-end Cold Chain Logistics is built to handle temperature-sensitive cargo from origin to destinations across the world.

This means specialised transportation and storage of perishable produce (chilled and frozen), integrating other offerings like import/export haulage and customs into your supply chain, all the while guided by dedicated reefer specialists.

What we offer

- End-to-end solutions
- Inland cold storage
- Landside transport
- Customs services
- Ocean transport
- Consolidation and deconsolidation
- Last-mile delivery

Integrated Cold Chain Logistics

Season's best offerings, packaged with our offerings

Visibility solution

Our reefer visibility assistant, Captain Peter with Remote Container Management helps keep an eye on the condition, location and status of your delicate cargo.

Value added services

Storage and transit solutions equipped to suit the cargo's unique needs. This includes blast freezing, individual quick freezing (IQF), pre-cooling, palletising, pick-and-pack, labelling, and inspections.

Multimodal transport

Make it to the destination no matter the distance. Choose our robust global network for first mile, middle mile and last mile deliveries.

Maersk expertise – How we serve you

End-to-end integrated solutions

We coordinate across touchpoints in your supply chain for you, so your fruit moves hassle-free.

Global cold storage network

Gain access to temperature-controlled warehouses across the world, including our hub in Durban, offering the value-added services you need.

State-of-the-art cooling technology

Our patented StarCare refrigerated cargo containers ensure your goods are kept fresh with temperature settings ranging between -25 degree and +25 degree Celsius.

Dedicated partner

We address your specific needs, create customised solutions, deliver real value and thereby foster long-lasting relationships.

Global network

Grow your market with Maersk's extensive land and ocean network spread across 120 countries.

Local market knowledge

Get faster market access for your produce with the help of our local refrigerated-cargo experts.
